Professional Summary

Full Stack Software Engineer with 7+ years of experience designing, developing, and delivering scalable, high-performance web applications and APIs. Skilled in building strong partnerships across product teams with a strong focus on scalable architectures, AI-enhanced solutions, and cloud-based development. Proven ability to build secure and maintainable software, optimize application performance, and deliver high-impact features across complex full-stack environments.

Technical Skills

Programming Languages: C# | Java | SQL | JavaScript | HTML | CSS | jQuery

Frameworks & Tools: Selenium | Microsoft Azure DevOps | .Net Core | Jenkins | GIT | GitHub | Telerick Kendo | Bootstrap | Swagger | Visual Studio | Visual Studio Code | Co-Pilot | Cursor | OpenAI

Key Expertise

- Full Stack Development
- Automated Testing
- Agile/Scrum
- Project Management
- UI/UX
- Database Management
- Full-Stack Application Development
- Performance Optimization
- Technical Documentation

Experience

General Motors | Austin, TX

Software Developer - Full Stack

Sep 2021 – Present

- Enhanced full-stack web applications using C#, ASP.NET Core, SQL Server, jQuery, HTML, CSS, and Telerik Kendo UI for General Motors CALMS (Centralized Asset Lifecycle Management System) internal application
- Served as the Co-Lead for working sessions with business stakeholders to gather requirements, prioritize requests for the application, lead demos, and gather feedback to improve application engagement
- Served as Scrum Master and Workplace Representative for a team of 15 developers and led weekly sprint stand ups to support development progress and prioritization of key efforts
- Designed, developed, and maintained RESTful APIs with ASP.NET Core, exposing secure, scalable business logic and data services; delivered Swagger/OpenAPI documentation and implemented end-to-end testing
- Delivered high-impact features across multiple ASP.NET Core applications, optimizing application performance, reducing architectural and cognitive complexity, and producing clean, maintainable code
- Managed application deployments across development and testing environments using automated Azure DevOps and GitHub Actions CI/CD pipelines, while supporting manual deployments to virtual machines
- Planned and executed Telerik Kendo UI framework upgrades, modernizing front-end components, improving application performance and usability, and ensuring compatibility with evolving technology standards
- Delivered hands-on training in ASP.NET Core architecture, coding standards, debugging techniques, source control, and deployment workflows
- Managed Azure DevOps dashboards to provide real-time visibility into sprint progress, development priorities, project risks, and delivery timelines, improving stakeholder communication

Software Developer Engineer - QA

Aug 2019 – Sept 2021

- Developed and maintained 700+ automated test cases spanning UI, REST APIs, data validation, and database integration
- Implemented CI/CD testing within Azure DevOps pipelines, applying DevOps best practices to automate test execution, accelerate feedback cycles, and reduce testing timelines by more than 50% while improving release quality
- Served as Test Lead across multiple projects, coordinating testing activities, facilitating cross-functional planning, managing work items in Azure DevOps, and delivering timely progress and defect reports to stakeholders

Education

Baylor University | Waco, TX

2019

Bachelor of Business Administration, Management Information Systems
